LORAN SEA

Continental 50 "Loran Grey", built by CNM Cantieri Navali del Mediterraneo, has left a mark in the history of yachting industry. Luxury, elegance, strength, agility, freedom. Continental 50 has been able to blend together all these features in just one yacht and the Most Innovative Yacht in the World award won at Cannes in 2008 is a glaring proof of it.

Designed to entertain and enjoy the sea, Continental 50 expresses this vocation in every detail. Large spaces, comfortable walkways that allow easy use even in motion, large sun decks that could also turn into tables, everything in its 16 meters length has been designed to enjoy the sun and amplify the excitement of a day outdoors. Three gangplanks, a huge one located aft and easily accessible from the water and two side ones that can be opened if necessary, allow you to live dynamically the sea and dive comfortably from different parts of the yacht.

Continental 50 "Loran Grey" therefore loves the sea but at the same time rules it. Equipped with two Man engines of 800 hp, the hull of this yacht guarantees an extraordinary stability and soft steps on the waves both on narrow paths and at higher speeds. All these elements give its drivers a reassuring feeling of safety.

Continental 50 is the ideal solution for those who want to go out to the sea everyday and have fun, but thanks to the two spacious, fully equipped cabins, the four beds and a bathroom with shower, it provides an excellent experience for even the longest voyages. Continental 50 "Loran Grey" is equipped with all comforts, guests will have a stereo set with 8 speakers and 4 sub, 1 TV set, a kitchen with a ceramic hob and a freetop griddle, 2 fridges, air conditioning, snorkeling material and bath towels. The offer also includes a welcome cocktail with Italian sparkling wine and the opportunity, on request, to practice an hour of personal watercraft (offer subject to geographical and time restrictions).
