The New Marquis 500 Sport Coupé
Product Announcement

MARQUIS 500 Sport Coupé

NUVOLARI  LENARD®

Meet the new Marquis 500 Sport Coupé

The new Marquis 500 Sport Coupé is one of the latest yacht created through the partnership of Italy's Nuvolari-Lenard Naval Architects and Marquis, America's foremost builder of premium quality yachts. The result is a trend setting sport coupé with styling, quality and performance that will stand out in any port throughout the world.

One of the yacht's striking features is its sleekly sculpted exterior profile which is formed using Marquis' unique 3-D multi-part hull and superstructure molding process. The results are readily apparent on the hull's aft quarter and chine as well as throughout the yacht's superstructure. This 3-D process not only contributes to the yacht's aesthetic appeal but also provides superior strength that will be felt and appreciated while underway.

Propulsion is provided by three Volvo Diesel engines equipped with innovative IPS drives. Performance is exhilarating. When equipped with Volvo IPS Series 600's the 500 Sport Coupé is expected to exceed a top speed of 37 knots. The IPS joystick makes docking and maneuvering this 50' yacht in tight quarters a snap.

Nuvolari-Lenard's heritage of designing the world's most innovative mega-yachts is obvious throughout the Marquis' 500 Sport Coupé's interior design and appointments. When you step into the yacht's salon you immediately realize that this is a special yacht. The 500 Sport Coupé's zebrano or cherry cabinetry, wooden floors and designer fixtures set this yacht apart from typical express style boats. But it's not just the components but also the hand crafted construction that puts the 500 Sport Coupé firmly within yacht grade status.

People who love being on the water will place high value on having the cockpit, salon, helm station and galley on the same level. The yacht's 4,65 m beam and 2,2 m of salon headroom provide a huge solarium-like environment further enhanced by the expansive power sunroof overhead. With a push of a button you can move the transom lounge aft which expands the size of the cockpit even more. Below deck is a master stateroom, two guest cabins and two head compartments each with its own enclosed stall shower.

Like all Marquis', the new 500 Sport Coupé is certified to CE-Class A specifications. That means it meets the European Union's highest standards and is built to be used with confidence on any body of water throughout the world.

The new Marquis 500 Sport Coupé is the ultimate blend of exceptional Italian styling and outstanding American yacht building craftsmanship. The first Marquis 500 Sport Coupé will be officially unveiled at the 2008 Miami International Boat Show.
