

GIEFFE YACHTS 60 is a semi-custom yacht which combines exceptional performance characteristics with sophisticated exterior styling and interior design. Powerful hull-lines by MP-Design on a light-medium displacement supported by a generous sail-plan give the yacht high speed with a great balance and sea-keeping qualities. Deck layout allows performance cruising in safety, easily handling with a small crew.

A white sailboat with large white sails is sailing on the ocean. The sails are fully deployed, and the boat is moving quickly, creating a white wake. The sky is clear blue, and the water is a deep blue. A small red flag is visible on the mast. The boat has a white hull and a wooden deck. A person is visible on the deck near the stern. The background shows a distant shoreline with some buildings and trees.

Our philosophy is to build a boat that guarantees safety, strength and lightness: construction is made in advanced composites of E-glass, Aramid and Carbon fibers, core-sandwich laminated with Epoxy vacuum bagged resin and post-cured.

Wide and spacious interior volumes where linearity of the modern interior architecture cohabits with reinterpreted technical solutions, result of a research of the highest functionality and accuracy.

The furnishing choice from glossy lacquers to leather and fabrics reflects the philosophy of Gieffe Yachts Architects to enhance customer aesthetical and conceptual individuality.

The harmoniously slender profile is emphasised by the stylish design of the deck-house which ensures a relaxation area with soft sundeck mattresses and gives a natural brightness to the saloon.

Elegance and comfort feature the cockpit-living area, well separated by the "maneuvering area". Efficiency and simplicity of rig and sail-plan make the yacht to be enjoyable in every sea condition.

GIEFFE YACHTS 60 is a performance fast cruiser with large interior volumes designed and conceived to be suitable to tailor-made furnishing, personal layouts and individual equipment specifications.
