

The word is out—the excitement is high.

C. P. Leek & Sons, builders of world-famous Pacemakers, announces its brand new subsidiary ALGLAS CORP. . . (and a brand new line of ALGLAS fiberglass cruisers!)

First off the line are four sleek and swift beauties—a 25' sport fisherman and an express cruiser to sleep four . . . and two 33' express cruiser models to sleep four or six. Take your choice for cruising, fishing, water sports and family fun!

Leek designers and production people worked two arduous years developing a fiberglass line that is all quality . . . Pacemaker quality! In every way. They are proudly from the Pacemaker family: high quality platingwork, unsurpassed gelcoats and such features as V-birth filler, bow rails, teaktop surfaces and stainless steel muffler all as standard equipment!

The proven Pacemaker hull design by David Martin dramatically reduces pounding, yawing and broaching, even at high speeds in rough seas. And just for the luxury of it, vinyl upholstered berths, grill-galley with polished steel sink, bulkheads with teak laminate overlay, interior hull sides covered with foam-backed vinyl, fire and mildew resistant vinyl upholstery on overhead.
