Strider 9 *Abarth Derivazione*

Sacs Abarth Derivazione is a 9-meter sports-rib for enthusiasts of a sporty look and high performance. Equipped with a pair of 4 liters V6 SUZUKI outboard engines rated 250 horse powers, especially designed for this exclusive version, it ensures breathtaking performance over 60 Knt. The livery features all the traditional Abarth product colors and a few elements on the upper deck reveal strong families ties with Powershore; ergonomic driver's seats, a wrap-around sofa for passengers with lateral protections over the tubolars provide the necessary safety for sailing at high speed. Are you brave enough to trim these two monsters engines of 4 liters when cruising at over 55 KN to get max speed over 60?

The project has been designed, just like the Abarth Powershore version, by Christian Grande's Design Works, which has enhanced the sporty character of the boat with a console that "looks" aggressive. Both bottom and structure have been designed for comfortable sailing at any cruising speed, offering, in addition, the opportunity to reach outstanding performance at full throttle. In order enjoy the maximum availability of space, utilizing the entire length of the upper deck, the engines are installed on a special bracket that also helps improving dynamic performance.

Strider 9

Project: SACS

Design: Christian Grande/
Centro studi FIAT ABARTH

Lenght Overall: 9,3 mt

Beam max: 3,1 mt

Draft at propeller: 0,5 mt

Fuel tank capacity: 400 lt

Fresh-water capacity: 80 lt

CE class: B

Weight with engine: 2,1 t

Cruising speed 45 KN

Top Speed over 60KN
