410

Beyond Boundaries

Bertram 410

Go above and beyond all imaginable limits on your quest to conquer the ocean that surrounds you. Whether you decide to take part in the most extreme fishing competition or spend a weekend cruising in the Bahamas, the adaptability of the Bertram 410 bestows infinite opportunities for adventure, excitement or leisure on your journey through the open water.

Surprisingly versatile and distinguished as an ultra luxurious cruising vessel, the 410 offers two extraordinary options which enhance the overall experience while out on the open water including a lower control station and new advanced forward window design. These full wrap around windows maximize visibility and brighten the interior of the salon. Surrounding all four sides of the salon, these windows create an open air experience that is perfect for entertaining anytime.

To enhance this comfortable cruising experience, the Bertram 410 also features an optional lower control station giving owners the opportunity to navigate from the comforts of the deluxe salon and benefit from unobstructed views of the open waters.

Like all models created by the legendary manufacturer, the 410 features the renowned deep-V hull design, distinguished for creating the smoothest ride in less than ideal conditions. Additionally, the lightweight structural foam composite bulkheads, salon floor and hull sides, a solid fiberglass bottom and an overbuilt stringer system all provide the solid displacement and strength that Bertram owners are accustomed to. With its renowned deep-V hull design, the 410 provides great performance across the board with projected cruising speeds of just fewer than 29 knots.

The 410's flybridge will profit from a larger cockpit overhang, offering a spacious and functional layout with added space aft of the helm seats. This enlarged U-shaped flybridge design features an extended cockpit overhang, ideal for relaxing in the cockpit. The large bridge offers forward and starboard seating for seven and also contains space for an optional refrigerator. Additional functional elements include improved helm position site lines, abundant grab rails and well-planned space for the latest large-screen electronics making the 410 an all encompassing sport-fishing yacht.

Fishing friendly features include a complete tackle and bait station, large in-floor fish box, live well and large transom door with lift gate that conveniently stores up to a dozen rods. An easy access hatch to the mechanical systems and machine area, a fast track drainage system and dedicated shore power cord tracks are other features that make this fishing machine easy to operate.

Beautiful, seamless craftsmanship, teak and holly flooring, luxurious fabrics, flat screen televisions and a spacious guest stateroom with side by side berths, all enhance the 410's uniquely spacious layout. The angled, open galley maximizes usable workspace, and the salon is roomy enough to opt for a windshield and second helm station forward of the dinette without feeling constricted.

Privacy is also a priority for all Bertram designs. Therefore, in addition to two spacious staterooms, two adjoining heads accommodate the hospitality needs of its owners. The 410 comfortably sleeps four below and two additional adults on the optional convertible sleeper sofa. Additionally, a 410 owner will enjoy added comfort and relaxation, thanks to advancements in additional sound dampening and noise insulation throughout the boat allowing for a very pleasant experience for everyone on board.
