

VIKING 50 CONVERTIBLE

Discover the Viking Difference - Experience and Pride.

The Viking Yacht Company is located on the Bass River, a winding marsh-lined tributary, which feeds into the Mullica River and flows into the Great Bay. About 50 minutes by boat to Atlantic City, the wilderness of the Bass River is a stark contrast to the leading edge technology, which precedes every Viking leaving the New Gretna facility. Building a better boat every day has been Viking's philosophy for over 44 years, and this is why Viking leads the industry today in performance, innovation, engineering and luxury. And Viking will also lead tomorrow because its commitment to excellence is reflected in the "Viking Difference."

FAMILY BUSINESS:

Brothers Bill and Bob Healey founded the Viking Yacht Company in 1964 and it remains family owned and operated. Viking is a debt free company and answers only to its unyielding commitment to build the finest boats money can buy.

STATE-OF-THE-ART-FACILITY:

The modern 810,000 square-foot manufacturing facility is equipped with the latest technology and machinery. From multiple CNC routers for cutting wood parts to a \$1 million five-axis profiler, which creates foam plugs to build complex molds, Viking clearly defines cutting edge. And yet, with our talented and skilled work force, the human element is equally dynamic.

INDUSTRY CERTIFIED:

All Viking Yachts are NMMA Certified Using ABYC Standards.

THE 90 PERCENT FACTOR:

Other than a few major components, such as engines and appliances, virtually every part of a Viking is designed and manufactured on the premises. Whether it is a fiberglass fuel tank or a wiring harness labeled every eight inches with its function, you can be sure of incomparable quality.

FRONT AND CENTER:

New product is the pulse of an engineering-driven company. Viking has the youngest fleet in the marine industry and new models are introduced regularly.

QUALITY CONTROL:

With its four production lines, Viking builds over 100 yachts a year from 45 to 82 feet. By manufacturing most of the yacht's components in house, Viking has an inherent quality control advantage. In addition, each yacht is thoroughly inspected by dedicated personnel during the build process. This attention to detail ensures greater reliability, safety and customer satisfaction.

FINEST SERVICE:

Experienced service personnel with an intimate knowledge of on-board systems stand behind every Viking Yacht. You never go to sea alone when you own a Viking.

VIKING SERVICE CENTER; VIKING INTERNATIONAL YACHT CENTER:

Located on the Intracoastal Waterway in Riviera Beach, Florida, and just minutes from Palm Beach Inlet, our two new service yards handle warranty, fiberglass and running gear repairs, as well as major renovations. Staffed by Viking-trained professionals, Viking is the only manufacturer to provide its owners with satellite facilities solely for their convenience.

PREFERRED INSURANCE RISK:

Vikings are highly regarded by insurance carriers.

RESALE:

Top-shelf engineering enables Vikings to deliver value, not only when you are using it, but at resale time as well.

VERTICAL INTEGRATION:

To complement the Viking experience, we have created two sister companies. Palm Beach Towers designs and crafts the finest aluminum tuna towers, custom railing, fiberglass hardtops, drop-down electronic boxes, flush-mounted electric teaser reels and a host of other specialized items. Atlantic Marine Electronics is the premier source for Viking installed navigation, communication and entertainment equipment. By specifying Palm Beach Towers and Atlantic Marine Electronics for your accessories, you are assured one-stop shopping and will enjoy taking delivery of your new Viking turnkey ready.

TOTAL FOCUS:

Continuous development with innovative details is the hallmark of a leading edge company and every model from 45 to 82 feet represents Viking's philosophy to build a better boat every day.

LEAD NOT FOLLOW:

Viking raises the bar by incorporating the best in design and performance. Powder-coated structural steel engine beds isolate vibration and ensure drive train alignment. The Delta-T hull-side mounted ventilation system keeps the engineroom dry and combustion and propulsion noise levels low. From technical advancements like frameless windows, underwater exhaust systems and tank testing to designer touches like curved doorways and exquisite joinery, Vikings are the epitome of luxury and seagoing excellence.

See for yourself why Viking craftsmanship and blue-water performance are the standards by which other boats are judged. Please contact your Viking dealer to arrange a factory tour and sea trial at your convenience and experience the "Viking Difference."

A PICTURE WORTH A THOUSAND WORDS AND SO MUCH MORE.

Ripping across open ocean water at better than 40 knots, the new Viking 50 Convertible is clearly in its element. Representing over 44 years of engineering excellence, the 50 C has created a new benchmark in mid-size convertibles with thundering performance, stunningly good looks, a gorgeous hand-finished teak interior, and a fishing cockpit packed with more amenities than a tackle shop has hooks.

AWAY WE GO!

The cockpit is central to a blue-water fishing machine. Aboard the 50 C, every inch of the 132 square-foot cockpit has function and purpose. Rounded coamings, flush-mounted stainless-steel rod holders, tag stick and gaff stowage, a transom door with walk thru gate, a tackle center and insulated wells for fish, live bait and stowage are but a few of the dozens of useful features that abound in the tournament proven cockpit.

There also is a delightful observation mezzanine so inviting with its plush seating and protection from spray and sun thanks to the extended flying bridge deck overhang. Its practical side affords engine room access, stowage and a deep freezer. Enjoying yourself was never so easy, or so much fun.

CLEAN MACHINE

With power-assisted hydraulic steering and electronic engine controls, the Viking 50 is a joy to handle. Standard power is MAN CRM 1100 mhp diesels and with a standard fuel load will provide 32 knot cruise speeds and a top end of 36 knots depending upon prevailing conditions and the sea state. A power package with MAN CRM 1360 mhp engines also is available to increase the cruise speed to 36 knots and to provide a top end of 40 knots depending upon load and existing conditions. Fuel, water, and waste tanks are made of fiberglass by Viking technicians with our exclusive resin infusion process and are designed to mirror the hull bottom for maximum draw from the tank capacity. Tanks are mounted low to maintain the boat's center of gravity and are fiberglassed into place to contribute additional strength to the hull structure.

Visibility at the helm is excellent thanks to the moderate bridge wings and a well-designed console with a custom-styled control pod. A pair of Murray Products teak ladder back helm seats with stainless-steel pedestals is standard and there is ample room to move about behind the seats. Electronics fit neatly in weather-protected pods on top of the molded fiberglass console and is viewable in all sea conditions. Compare a Viking's navigation and fishing electronics console to anything else on the water and the difference in utility, practicality, and appearance is immediately apparent. It's just another example of how Viking design and engineering is often imitated but never equaled.

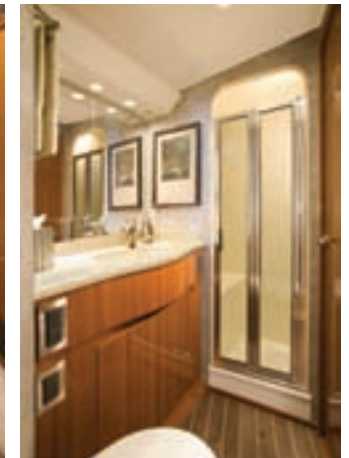

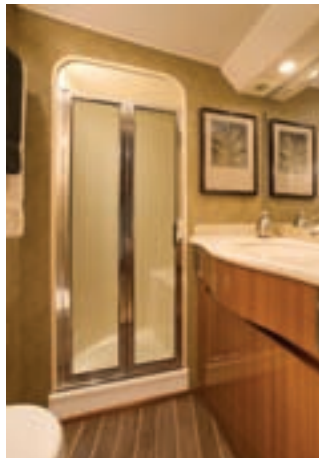

A cooler box on the bridge can be ordered with refrigeration. The option provides for a dual thermostat so the box can serve as either a refrigerator or freezer box as required.

A BLUEPRINT OF LUXURY

The salon is a showcase of discerning design. Entered through a sliding fiberglass door from the cockpit, the rich teak joinery with a choice of high gloss or satin finish and plush designer furnishings provide a most welcome retreat for relaxing and entertaining. A walk-through galley with a convenient Corian-topped island and a pair of bar stools serves as the focal point. The galley has under counter sliding drawer refrigeration, an electric cooktop, microwave/convection oven, a high gloss Corian countertop, and custom Amtico flooring. To port, an inviting L-shaped lounge with stowage below is accented with a convenient teak cocktail table, while forward the dinette beckons. Cool air flows from concealed registers behind the valances for better distribution, and a home-theater entertainment system features a 37-inch flat screen television.

The three-stateroom, two-head layout offers generous comfort and privacy for six. In the master stateroom there is a queen-sized walk around berth with an upholstered headboard, mattress and lift top, which exposes plenty of stowage below, reading lights, a large maple-lined hanging locker, and an entertainment system. The privately accessed head has Amtico vinyl flooring, a teak-faced Corian counter with built-in sink, a fiberglass shower stall with seat, and an electric MSD. Port and forward guest staterooms each offer the flexibility of upper and lower berths and share the second head. A laundry center is located adjacent to the companionway steps.

SPECIFICATIONS

VIKING 50 CONVERTIBLE		
Length, Overall (L.O.A.)	50 ft. 6 in.	15.39 m
Length, Overall w/bow pulpit	54 ft. 8 in.	16.66 m
